

Upgrade Accelerator

As the only software vendor solely focused on data management, CommVault provides a better way to manage data. Our commitment to customers and superior service and technical support are key ingredients to this better way—we continually enhance and expand the scope of our Services to meet your challenges. Our ultimate goal is to reduce needless downtime and give you unlimited data access to increase your company's competitive edge.

As part of CommVault® BUILD Services, the Accelerator offerings speed your time to proficiency with CommVault® Simpana® software implementation and optimization, while minimizing both risk and cost.

Staying current with the CommVault Simpana software suite ensures latest functionality to keep your solution optimally configured to meet business and technical requirements. Upgrade Accelerator streamlines the move from up to two prior release versions of the CommVault Common Technology Engine. Our industry-leading Certified Consulting Engineers work with your staff for a seamless transition ensuring that the information about your protected data will be preserved.

Upgrade Accelerator can also be expanded to include iDataAgent modules, as well as configuration of new features or functionality afforded by the latest release.

Included Services:

Project Coordination

- ▶ Provides single point-of-contact for scheduling of CommVault resources and risk mitigation review to ensure quality delivery in a timely manner.

Environment Validation

- ▶ Confirms that system requirements have been met.

Microsoft SQL Server Upgrade

- ▶ Ensures that the CommServe® database is at the latest version with all required updates.

Common Technology Engine Upgrade

- ▶ Upgrades the CommServe server and Media Agent module(s) within the CommCell® group.

Knowledge Transfer

- ▶ Familiarizes your team with new features and functionality included in the latest release, and how those may benefit your solution.

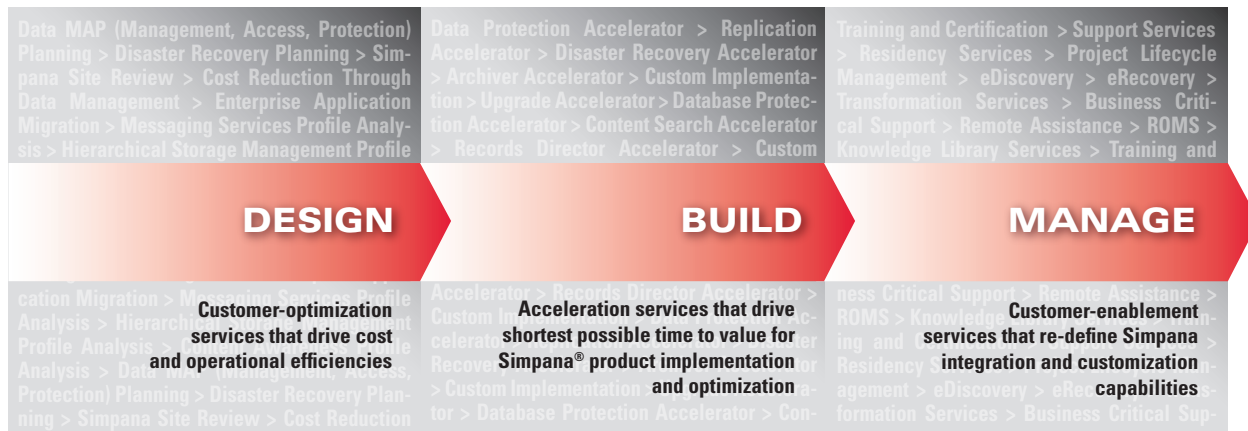

Summary Reports

- ▶ Provides details of your customized environment, including Simpana configuration, data protection targets, licenses, schedules, and policies.

Comprehensive Services Offerings

CommVault offers a full spectrum of services that optimize and speed your proficiency with the CommVault® Simpana® software suite. Designed with your technical and business objectives in mind, our DESIGN, BUILD, and MANAGE services help companies, like yours, optimize data management, access, and protection in data centers of all sizes.

CommVault's industry-leading engineers and trainers partner with you to meet and assess your IT requirements, now and into the future. They work with you to decide and deploy the optimal services and training alternatives to help you do more with less, faster. For additional detail, please visit us online at services.commvault.com.

About CommVault® Simpana® Software

CommVault Simpana Backup & Recovery, Archive, Replication, Resource Management and Search software is designed to work together seamlessly from the ground up, sharing a single code and common function set. This exclusive single-platform architecture enables unparalleled software efficiency, performance and reliability for unprecedented control over data growth, costs and risk.
